July 8, 2010

Board of Directors  
Ventura Regional Sanitation District  
Ventura, CA 93003

## Construction and Demolition (C & D) Disposal Totals at Toland Road Landfill

During the July 1, 2010 Ventura Regional Sanitation District Board Meeting, there was a discussion regarding how the economy and recycling efforts have impacted the volume of material received at the Toland Road Landfill. Director Gillette requested staff to provide information regarding the trends in disposal of C & D material taken to the landfill. While this material has never accounted for a substantial volume of material disposed at Toland, with recycling efforts and alternative disposal options, the amount of this material has declined over the years. Table 1 below provides you with data showing the percent of C & D relative to the total refuse disposed

Table 1

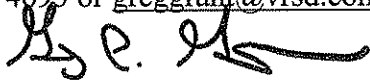

Year	Origin	Material	Total	Annual Tonnage	% C & D
2007	Fillmore	C & D	143.28	357407.08	0.32
	Unincorporated	C & D	154.46		
	Santa Paula	C & D	880.39		
			1178.13		
2008	Fillmore	C & D	250.72	355140.72	0.38
	Santa Paula	C & D	736.49		
	Unincorporated	C & D	371.87		
			1359.08		
2009	Fillmore	C & D	87.14	335286.41	0.10
	Santa Paula	C & D	83.1		
	Unincorporated	C & D	192.18		
			362.42		
2010	Fillmore	C & D	23.14	167584.09	0.004
	Santa Paula	C & D	13.38		
	Unincorporated	C & D	37.9		
			74.42		
This total for 2010 is for Jan, Feb, Mar, Apr, May, Jun - only					

Item 11-1

It is important to note, the table represents only material that is directly hauled to Toland Road Landfill from within the Santa Clara Valley. Some additional portion of the C & D material comes to Toland as mixed refuse from both Gold Coast and Del Norte though there is no way to determine that volume. Additionally, Gold Coast diverts a small portion of their C & D material to Agromin where it is ground and used as ADC at the Simi Valley Landfill.

If you have any questions or need additional information, please contact Mr. Greg Grant at 658 4693 or [greggrant@vrsd.com](mailto:greggrant@vrsd.com).
