Board of Directors
Ventura Regional Sanitation District
Ventura, California

APPROVE, AND AUTHORIZE DESIGNATED STAFF TO SIGN, PROPOSED PURCHASE ORDER WITH TUDOR HEAVY EQUIPMENT SALES FOR A PETE 348 6X6 WATER TRUCK FOR USE AT THE TOLAND ROAD LANDFILL

RECOMMENDATION

Approve issuance of Purchase Order No. 2790 to Tudor Equipment Sales to purchase a Pete 348 6x6 Water Truck- HD off-road truck for an amount not to exceed \$320,000.

FISCAL IMPACT

\$206,000 in funding for this vehicle purchase was included in the Board-approved FY2021-22 Budget, under account codes 01-800-52330-599901, which was carried over into the FY2022-23 Budget. The additional funds needed for this purchase will come from a \$60,000 savings in the purchase of the new 627 scraper and the \$54,000 from the salvage of the D8 Dozer 7978.

BACKGROUND/ANALYSIS

As part of daily operations at the Toland Road Landfill, District staff sprays water on the access road, active fill area, slopes, and construction areas of the landfill as a proven dust control measure. Dust control or suppression is required by the Conditional Use Permit.

Currently, the Toland Road Landfill staff uses general purpose water trucks that you would see on most construction sites, and the trucks do accomplish the job. However, the conditions and topography at Toland Road landfill are extreme for this type of trucks, and we have experienced several break downs resulting in costly repairs and the use of rental equipment while the trucks are being repaired. A new truck was included in the FY21-22 budget to replace one of the water trucks that has reached its useful life and is no longer operational due to engine failure. This is why District staff is recommending the purchase of a heavy duty 6x6 water truck that is designed to handle the conditions at the landfill and will be able to out perform the current equipment.

Since this a custom build truck, District staff contacted Tudor who is builder for these types of trucks to obtain a quote or a truck that would be able to handle the conditions at

Toland Road Landfill. Another manufacturer, Valew Truck Beds, was contacted about this custom build, but they declined to supply a quote as it would be approximately two years before they could build a truck for VRSD.

Therefore, based upon the foregoing explanation and the continuing need to control dust at the Toland Road Landfill site, District staff recommends Board approval of this purchase order for a custom build water truck from Tudor for an amount not to exceed \$320,000.

This letter has been reviewed by Legal Counsel as to form.
